PROFESSIONAL SUMMARY

Entrepreneur and product architect with more than 20 years in education technology. I have strong ability to design, build, and launch SaaS platforms from idea until market. CPA-trained and validated in **Next AI Bootcamp '25**. I am motivated to co-found ventures that take research breakthroughs and make them into companies that can grow global.

ENTREPRENEURIAL EXPERIENCE

Founder & Chief Product Architect | NeuroLabs Inc. (Canada)

Montreal, Canada | 2025 – Present

As the founder of NeuroLabs, my personal innovation lab, I have architected two complete, market-ready ventures from concept to functional MVP. My role has been to lead all aspects of product architecture, business model design, and strategic planning.

Key Projects Architected:

iSlidew (EdTech SaaS Platform):

- Designed a proprietary 9-gem AI engine that transforms passive educational content into an active, gamified "cognitive workout."
- Architected a complete, bilingual platform with advanced features including a competition mode, specialized learning modules (KG to iMaster), and full administrative dashboards for teachers /schools or hr / corporate sectors.

MMM (Multi Marketing Media Platform):

- Created the complete business and platform architecture for a sophisticated three-sided marketplace connecting brands, trusted ambassadors, and local merchants at "zero-commission", "zero-cost".

ADDITIONAL PROFESSIONAL EXPERIENCE

Official Exam Auditor | (Contract-Based)

Montreal, QC | Contract-Based

- Conducted on-site audits on behalf of Prometric and Paragon Testing Enterprises.
- Served as a "secret auditor" for Kryterion to validate the security protocols for Google Cloud Certification Exams.

Supervisor, Award-Winning EdTech Project

UAE-IT Challenge Winner | 2002 – 2004

- Supervised the team that built [UAEMATH](#), an interactive math learning website.
- Finalist in the [Stockholm Challenge](#) Award (international competition).

RELEVANT WORK EXPERIENCE

Senior Math Reviewer

Outlier.ai, Montreal, Canada | 2022 – 2024

- Trained AI models (ChatGPT, Gemini) to improve accuracy in math and education.
- Gained hands-on experience in applied AI for learning.

Math Consultant (Self-Employed)

2009-2022

Served as a Teacher Assistant at Concordia University, conducting research in areas including the Cantor Set, problem-solving heuristics, and affective learning in technology. Led integration projects for platforms such as MyMathLab and Moodle.

EDUCATION

- Master's in Teaching Mathematics, Concordia University
- Bachelor of Arts in Mathematics, American University of Beirut
- Teaching Diploma, American University of Beirut
